# Yash Kadaru Engineer | Designer

+1 647-782-3531 hello@yashkadaru.com yashkadaru.com

Highlights 7+ years experience building software that embodies good design, clear purpose, and skillful engineering

**Key Skills** Eager and quick to learn, resourceful, and creative

Technical Tools Javascript (React, Redux, Angular, Vue.js, Typescript, Node.js, Express, Socket.io, Ionic), C#/.NET, HTML, CSS/LESS/Sass, PostCSS, Ruby on Rails, Java, Python, PHP, Postgres, MongoDB, MySQL, Bundling & Task Runner Tools (Webpack, ESBuild, Vite, Gulp), DevOps Tools, NGINX, XML & Mail (Flowgear, Mailgun), Payment

(Stripe, Braintree), Testing (JUnit, Mocha, Puppeteer, Sinon, Jest, Jasmine, Storybook)

**Other Tools** Sketch, Figma, Zeplin, Affinity Designer, Heroku, AWS, Netlify, Firebase, Digital Ocean, Bitnami, Gitlab CI/CD,

Docker, Codeship, BuddyCI, Cloudflare, Sentry, Ghost Inspector, BrowserStack, Heap Analytics, Postman

## Freelance and Personal Projects

## Pigeon JeVis

A simplified, efficient take on the traditional IT Help Desk that I pitched, designed, and developed at my first job (2015) [PHP, SQL, HTML/Sass, JS]

#### **Blaze**

A fast-paced, ridiculously fun, and explosive web-based game based on Connect 4 (2015) [Node, Socket, Express, HTML/Sass/jQuery]

## JeVis Bridal

E-Commerce website for a bridal designer (2017) [Shopify, Sketch, Illustrator, Paper iOS]

## **Cahoots Theatre Company**

Rebranded, designed, and developed the website for a well-known Toronto theatre company. (Launching Soon) [Webflow CMS]

Check my Github page or LinkedIn profile for more.

#### **TEDxMcMasterU**

Designed and built the static website for 2016's TEDx Conference organized by McMaster students (2016) [Sketch, HTML/Sass/JS]

## Matcha

Pitched a service that uses data science to intelligently match restaurants & suppliers to other similar entities to reduce food waste. Won 3rd place in FinTech challenge at Elevate Tech Fest (2020) [React, Tailwind]

## **Experience**

## Software Developer II & Educator | Konrad Group & BrainStation

May 2018 - Current

Developed a Shopify-powered storefront prototype that **won a multi-billion dollar client**. Helped develop an AEM, Java, Web Tech (HTML, CSS, Javascript), and GraphQL powered **online storefront** for a **major retailer**. Contributed to two Angular projects for a **renowned bank**. **Taught two**, **three-month Web Development Bootcamps** at BrainStation, with an overall **4.7/5 educator rating**. **Developed a content management system** for the entire curriculum, which had not previously existed, and created original lesson plans, lectures, workshops, take-home projects, and whiteboard exercises which Educators continue to use today. **Contributed to BrainStation's entire technology portfolio**, building features for various applications such as their flagship LMS - Synapse, Internal CRM and administration dashboard - Cortex, Marketing Site, Annual Digital Skills Survey, and a Gutenberg-enabled WordPress publishing platform. Built these projects leveraging C#, .NET, Postgres, React, Redux, Node.js, AWS infrastructure, Webpack, and other technologies.

#### Software Developer | Ian Martin Group & Fitzii

May 2016 - August 2017

Built a system of automations in C#/.NET that were critical in improving efficiency and employee/contractor satisfaction. Independently managed projects from design to implementation, balancing the needs of four different stakeholders. Built a career portal in Angular (careers.ianmartin.com), increasing candidate engagement (84%) compared to their previous WordPress site. Built an automated system that sent out company-funded redemption codes to contractors, allowing them to donate to various charities through the Kiva platform. This new system created a 60% increase in loans and allowed Ian Martin to beat Google in loans per month. Built an automated privacy consent tracking system in React. Learnt Ruby On Rails in two months to contribute to Fitzii, a digital hiring and application platform powered by data science and psychology.

## IT Assistant & Junior Developer | McMaster University

November 2014 - May 2016

**Pitched and built the 'Pigeon'** app to help staff from five sub-departments communicate their IT requests more efficiently. **Helped maintain existing** apps for move-in, move-out, department inventory, and residence tours. **Designed various graphics** that were used in key campus events, such as Welcome Week Info Cards and Move-In Schedules. **Maintained IT infrastructure for five sub-departments** and **helped maintain 99% server uptime**. Managed the streaming content display system in residences. **Pitched and implemented remote monitoring** for this system, which **increased uptime by 25%** and made management easier & more efficient.

Check my LinkedIn profile for more details on my additional team contributions.

## **Education**

## Software Engineering & Co-op | McMaster University

September 2013 - 2019

Awarded entrance scholarship and bursaries in second and third year for high academic standing. Active participation in intramural sports for four years.

## **Special Interests**

Adjudicated the Canada-Wide Virtual Science Fair for the Technology category - **2021**Attended several Hackathons (Hack the North, YHacks, DeltaHacks, Elevate - 3rd place winner) - **2014, 2015, 2016, 2020**Volunteered for the Deltahacks Management Team and helped start McMaster's first technology club, HackItMac - **2015**
